

What People are Saying About Aurora

"We've partnered with Rorke Data and its Galaxy product line for our Kona and Xena video post systems because of their great support and longevity in the market along with a wide variety of solutions that meet the demands of our customers. The reliability and maturity of Rorke Data's products make us confident that our customers are getting the best solution for their application with a path for support in the future."

**Paul Weiser, Vice President of Sales & Marketing,
AJA Video Systems**

"We at Blackmagic have known that Rorke Data's Audio Video Storage Division has offered cutting edge high performance RAID storage products for the post industry for years. Post production professionals at every level are going to appreciate that they can use their Blackmagic Design products with Rorke Data's new Aurora LS RAID storage system. The EOS style RAID engine enables cutting edge high performance, as well as seamlessly integrates into our customers' SAN environments. We are very pleased to support the new Aurora LS, another excellent tool to facilitate our customers' creativity and production."

**Dan May, President,
Blackmagic Design**

"The Galaxy Aurora SAN solution's superior performance capability and low cost of ownership make it ideally suited to the post-production market. Rorke's unique integration capabilities provide a mix of application-specific storage solutions with name brand workstations and servers, and they back the offerings with global support – which suits our customer base perfectly."

**Patrick Palmer, COO
Iridas**

"SSL has worked with Rorke for years and now we are recommending Rorke Data's complete product line of disk, SAN and library systems based on Rorke's HDX and DVA solutions. Rorke's storage product line is a perfect match to our Gravity system."

**Shaun McTernan, Product Manager Media Production Systems,
Solid State Logic**

"The combination of Assimilate's Scratch front-end coupled with the dual RED Code stream capable Aurora back-end RAID storage has improved the way we can offer D1 tools to our clients' projects. To work with high-resolution footage in a real-time post process is a major breakthrough in filmmaking. Now that SCRATCH is integrated with the ultra fast Aurora RAID system, we can feel confident that both production and post production timelines can be reduced significantly."

**Tony Cacciarelli, Vice president of Marketing,
Assimilate**

"We're excited to be partnering with Rorke to offer their storage solutions, including the Galaxy Storage line to our clients. Rorke's versatility to keep pace with a value based price/performance ratio is ideal for our organization and allows us to offer our clients the ability to maximize their equipment investments while streamlining their product infrastructure."

**Dean Lyon, Vice President of Marketing,
da Vinci Systems**

"Bluefish444 is excited to partner with Rorke Data regarding their latest RAID storage system, Aurora LS. This latest RAID product supports all video encoded formats from SD to HD as well as 2k DPX."

**Craige Mott, Managing Director,
Bluefish444**

"Using the Galaxy Aurora at Bling Imaging we have built out a real-time RED footage 4K system for digital dailies, beauty retouching, and digital re-lighting. Additionally, the setup is able to manage playback of multiple streams of 2k footage for our Stereoscopic 3D Projection system."

**Paal Anand, Digital Production Workflow Specialist,
Bling Imaging**
